

# JAVA JUNIOR DEVELOPER

## JOB DESCRIPTION

### MISSION:

Our Java Junior Developer (JJD) will report to and actively cooperate with our internal team of developers.

His or her daily solutions will help our clients to complete their challenges in terms of CRM, marketing and communication.

The JJD enjoys taking on a global project, from analysis to delivery (analysis, development, testing, infrastructure, maintenance and documentation).

### CONCRETELY:

#### OUR FUTURE JJD HAS A THOROUGH KNOWLEDGE OF THE FOLLOWING TECHNICAL FRAMEWORKS:

- Web: HTML 4 & 5, JavaScript, JSON, JQuery (Ajax), XML
- Java: JAVA/J2EE, JSP, Servlets, Spring, Hibernate, Eclipse, Junit, JMeter, Maven, Lucene
- Application servers: Tomcat 8/9, Apache
- Frameworks: Spring, Hibernate, MVC, Pentaho, ...
- Database: SQL, PL/SQL, Oracle, MySql, NoSql
- OS: Linux, Windows
- Strong object-oriented programming knowledge, and willingness to work with Java

#### NOT MANDATORY BUT WARMLY WELCOME:

- Aware of performance and scalability aspects
- High performance / multi-threaded / distributed algorithms
- Understanding of fundamental search engine concepts: Lucene, Elasticsearch, Solr or Java-based search engines
- Familiarity with or interest in agile or lean development methodologies
- Good command of Linux operating systems
- Full professional proficiency (written and spoken) in English

#### PROFILE

- Bachelor's degree or equivalent
- Ability to work within a fast-moving environment, where technology, creativity and flexibility are keywords
- Outstanding organizational abilities
- Self-driven, proactive and fast learner
- Structured soul but flexible heart. Or the opposite.
- Stress resistant
- Able to work autonomous and bring new initiatives to the table
- Dynamic and creative
- Full professional proficiency in at least 1 of our official languages (FR or NL) + English
